Health Screening

Tested in Millions of Measurements with 95% accuracy

BioGraph Meridian Diagnosis - A computer based diagnostic system.

The „BioGraph Meridian Diagnostic system“ is a sophisticated device for measuring the meridian energy in all 12 major meridians. Easy to read graphs display meridian blockages, overall energy level according to the age of the client, yin-yang balance - left/right, top/bottom, meridian symmetry and the energy level in any of the 12 main meridians. Each meridian is displayed in a bar chart left and right. A single measurement takes **only a few minutes**. There are 40 measuring points on the fingers and toes. Two points on each finger and toe.

To take the measurement is easy and does not require special experience. A spring loaded pointer provides the exact pressure and a signal confirms the correct point or when a point is missed. On the computer screen you can see each measuring point in order, according to the measuring procedure.

Benefits of Meridian Diagnosis for the Therapist and the Client:

- Complete analyses of the entire system
 - Uncover unknown meridian blockages within minutes
 - Treat (delete) existing blockages in minutes
 - Convert therapy resistant clients into therapy receptive clients

 - Highest success rate without long term invasive procedures
